Prelude

“Clouds” - 16 Lovers Lane, The Go-Betweens

<https://youtu.be/f04jDgwsK6s>

'The clouds are here
They aren't up in the sky.
I cupped them with my hands
and reached up high.
I said to these clouds,
"no more am I blind.
I have to see straight
and that will make me unkind."

Visions of blue,
I'm angry, I'm wise. And you,
You're under cloudy skies.
Blue air I crave blue air I breathe
They once chopped my heart the way you chop a tree.
Told to equate Achievement with Pain
I stole their top prize and paid them back with rain.

Visions of blue, I'm angry, I'm wise. And you,
You're under cloudy skies.
Perverse and strong and you.
You're under cloudy skies.
What I did once I now do every day.'

Eating Noreen

cake +

frosting +

= celebration

lighting the candles

triangular pieces

yummy crumbs

crying joyfully

squish and lick

the filling

off the plate

it all goes back to the kitchen sink

when the cake is gone

In Life

wadding not running
tacking not avoiding
putting me back into a place
for quiet complementation
deeper than yesterday
finding solace in daydreams
and in your eyes

A Piece of the Action

'Well, I am new to all this internet stuff and has only been on the site for days and have not talked to any man from there. I knew of a friend who got hooked up with a very nice man on there and they are happily married and live in Italy, so he introduced me to the site and I said let me join and see where it will take me.

I need a man that would be ready to make me happy, a man that would heal the wound of my broken heart, a man that would see the better side of me, a man that would not be aggressive and who would not want to hurt my feelings, I need real love and truth including honesty from my man, trust is the basic foundation of a lasting relationship and I desire that we uphold our integrity towards each other. Can you be that man I seek and desire?

Character and intelligence, honesty, someone who is fun-spirited and playful. "Chemistry" is important to me in my partner. I am looking for someone who seeks someone else to really explore life together with and the willingness to work at making a relationship stronger, that holds much more weight. Every time I look, I think I find someone but they just screw me over and that's not what I want but I'm looking for a relationship that will last and one that I can have fun with, someone who is honest, loyal, able to share happiness and sadness, similar life goals, when all these things are there then everything else will fall into place.

No secrets. I have explored some things but not enough to see a lot of what life has to offer out there, that would be grand to do it together with you. A relationship is teamwork and one person cannot do it alone. I have been screwed a few nasty times but never let it make me bitter, I chalk it up to experience, learn from it and ensure I never treat people the wrong way I was treated or taken advantage of. I want to have fun, share happiness, cry together, smile when we achieve the goals we set together, and most important Love Each Other with our whole hearts.'

cohesion tension theory (CTT)

'Water is a polar molecule. When two water molecules approach one another, the slightly negatively charged oxygen atom of one forms a hydrogen bond with a slightly positively charged hydrogen atom in the other. This attractive force, along with other intermolecular forces, is one of the principal factors responsible for the occurrence of surface tension in liquid water. **It also allows plants to draw water from the root through the xylem to the leaf.**

Water is constantly lost through transpiration from the leaf. When one water molecule is lost another is pulled along by the processes of cohesion and tension. Transpiration pulls, utilizing capillary action and the inherent surface tension of water, is the primary mechanism of water movement in plants. However, it is not the only mechanism involved. **Any use of water in leaves forces water to move into them.**

Transpiration in leaves creates tension (differential pressure) in the cell walls of mesophyll cells. Because of this tension, water is being pulled up from the roots into the leaves, helped by cohesion (the pull between individual water molecules, due to hydrogen bonds) and adhesion (the stickiness between water molecules and the hydrophilic cell walls of plants). **This mechanism of water flow works because of water potential (water flows from high to low potential), and the rules of simple diffusion.'** https://en.wikipedia.org/wiki/Xylem#Cohesion-tension_theory

Questions:

In times of drought, do you understand the implications of CTT?

Can you write a poem using CTT?

Who owns water?

What is CTT as a metaphor?

What is diffusion?

Crypto Nite Woman

“Open your eyes and give you a gentle blessing, may it bring you health, luck and happiness every minute and every second.”

These days my girlfriend is pushing and prodding me to join her in the crypto game. She wears the pants in our relationship. This is a strange new world to me.

The deep crypto jargon alone leaves me blank.

Screen shots are flying back and forth now. Even with the distance between us, she tutors and I take in little bytes at a time. Learning is the curve.

Crypto.com is the exchange. It's "data night":

An index is a tool that lets investors measure a portfolio of stocks in a given market. It provides benchmarks for a certain market to manage active or passive stock portfolios. Being part of an index is also a symbol of the status of a constituent company, and trading constituent stocks can clearly support the stock price. The composite index can create investment products to give investors access to some restricted markets or stock portfolios.

Now many people are doing QSQ index to earn more income.

USDT is 1:1 with the US dollar and will not depreciate. This is why digital currencies have USDT as a stable coin.

I am earning Crypto.com Deposit. USDT to my QSQ for earnings. I am now withdrawing my QSQ earnings to my bank account at any time.

Kiss me.
